

The Trillionaire Rich List

We've all heard of the Forbes Rich List (known as The World's Billionaire's list), but will we ever see a trillionaires rich list?

The chances are that yes we will, but who exactly will the lucky few be? We've estimated which of the current richest 20 people in the world are in with a chance, by looking at how much their net worth increased from 2016 to 2017, and then applying that same increase year on year.

Of course, there are a whole lot of variables here, and we're assuming that their investments continue to grow at the same rate as they are doing, but there's no reason why some of them couldn't!
